

Supplementary Appendix

This appendix has been provided by the authors to give readers additional information about their work.

Supplement to: Zheng W, McLerran DF, Rolland B, et al. Association between body-mass index and risk of death in more than 1 million Asians. *N Engl J Med* 2011;364:719-29.

Supplementary Materials

Association between Body-Mass Index and Risk of Death in More Than 1 Million Asians Wei Zheng, et al.

Authors' contributions

Wei Zheng, Paolo Boffetta, and John Potter developed the concept and the plan for this project. Dale McLerran managed the pooled dataset and performed the statistical analysis in collaboration with Mark Thornquist and Ziding Feng. Betsy Rolland coordinated the project. Manami Inoue and Keitaro Matsuo coordinated the Japanese cohort studies. Daehee Kang and John Potter coordinated the Asia Cohort Consortium. Wei Zheng drafted the data analysis plan and the manuscript with significant contributions from Dale McLerran, Betsy Rolland, Xianglan Zhang, Ziding Feng, Paolo Boffetta, and John Potter. All other authors have conducted the original cohorts, provided data for the pooled analysis, and/or assisted in the data management. All authors reviewed and approved the final version of the manuscript.

Acknowledgements

The pooled analysis was funded by the Fred Hutchinson Cancer Research Center. Participating cohort studies (funding sources) in the consortium are as follows: the Mumbai Cohort Study [Mumbai, funding sources: International Agency for Research on Cancer, Clinical Trials Service Unit/ Oxford University, World Health Organization]; the Trivandrum Oral Cancer Screening (TOCS) Trial (funding sources: Association for International Cancer Research, St Andrews, UK, and Cancer Research UK); the Health Effects of Arsenic Longitudinal Study [Bangladesh, funding sources: NIH (P42ES010349, R01CA102484, R01CA107431)]; the China National Hypertension Survey Epidemiology Follow-up Study [CHEFS, funding sources: American Heart Association (9750612N), NHLBI (U01 HL072507), Chinese Academy of Medical Sciences]; the Shanghai Cohort Study [SCS, funding sources: NIH (R01CA0403092, R01CA144034)]; the Shanghai Men's Health Study [SMHS, funding sources: NIH (R01 CA 82729)]; the Shanghai Women's Health Study [SWHS, funding sources: NIH (R37 CA70867)]; the Community-Based Cancer Screening Project [CBCSP, funding sources: National Science Council and Department of Health, Taiwan]; CardioVascular Disease risk FACTor Two-township Study [CVDFACTS, funding sources: Department of Health, Taiwan (DOH80-27, DOH81-021, DOH8202-1027, DOH83-TD-015, and DOH84-TD-006)]; the Singapore Chinese Health Study [SCHS, funding sources: NIH (R01CA55069, R35CA53890, R01CA80205, R01CA144034)]; and the Korea Multi-center Cancer Cohort [KMCC, funding sources: Ministry of Education, Science and Technology, Korea (2009-0087452), National Research Foundation of Korea (2009-0087452)]. The Japanese cohorts: the Three Prefecture Cohort Study Aichi (3-Prefecture Aichi); the Ibaraki Prefectural Health Study; The Japanese Collaborative Cohort Study (JACC); the Japan Public Health Center-based Prospective Study (JPHC1, JPHC2); the Three Prefecture Cohort Study Miyagi (3-Prefecture Miyagi); the Miyagi Cohort Study (Miyagi); and the Ohsaki National Health Insurance Cohort Study (Ohsaki), are supported by the Grant-in-aid for Cancer Research, the Grant for the Third Term Comprehensive Control Research for Cancer, the Grant for Health Services, the Grant for Medical Services for Aged and Health Promotion, the Grant for Comprehensive Research on Cardiovascular and Life-style Related Diseases from the Ministry of Health, Labour and Welfare, Japan, and the Grant for Scientific Research from the Ministry of Education, Culture, Sports, Science and Technology, Japan.
